

Garren Dullas

IT student specializing in cloud computing and systems administration, with hands-on experience deploying applications on AWS, Azure, Firebase, and Google Cloud. Passionate about designing scalable, reliable solutions with modern cloud technologies.

PROJECTS

Lifeline — Project Manager

December 2024 – April 2025

- Built a cross-platform emergency response app with 5+ APIs, supporting real-time voice, translation, and location tracking.
- Designed Firebase backend (Auth, Firestore, Functions, Storage) and integrated AI summarizer (spaCy & DistilGPT2).
- Deployed full-stack system (Flutter, Node.js) with web dashboard on AWS & [Fly.io](https://fly.io).

JobBoard-DevOps

October 2025

- Architected and implemented full-stack job board application serving minimum-wage job seekers
- Cloud migration from AWS to Azure Serverless
- Designed scalable serverless architecture using Azure Static Web Apps, Container Apps, and MySQL Flexible Server
- Implemented complete DevOps pipeline with Docker containerization, Github Actions CI/CD, and ARM template
- Technologies: React.js, [Node.js](https://nodejs.org/), MySQL, Azure (Serverless), Docker, GitHub Actions, ARM Templates.

Project-ISO

September 2025 – November 2025

- Architected and developed an ISO 21001 Validation Application for Jose Rizal University using Laravel.
- Built and deployed Python Flask microservice with 8 machine learning models to handle ISO 21001 compliance prediction, student sentiment analysis, and dropout risk assessment.
- Implemented a hybrid-cloud deployment, hosting the core Laravel application on Cloudways and the containerized AI service on Fly.io.
- Technologies: Laravel (PHP), Python/Flask, MySQL, Cloudways, Fly.io, Docker.

CERTIFICATIONS

CompTIA ITF+

IT Specialist – Java

IT Specialist –
Databases

Wadhvani – Job Ready:
Employability Skills

SKILLS

Languages: Java, Dart,
JavaScript, TypeScript

Frameworks & Libraries:
Flutter, Node.js, React

Cloud & Tools: Firebase,
Google Cloud APIs, Fly.io,
AWS, Azure

Containerization: Docker
& Kubernetes

Systems & Platforms:
Windows Server, Linux,
Android, macOS

Other Skills: Network
troubleshooting,
Virtualization (VMware)

SOFT SKILLS

Project leadership

Problem-solving

Communication

Self-learning

EDUCATION

Jose Rizal University , Mandaluyong — *B.S Information Technology*

August 2023 - Present

Expected Graduation: 2027

EXPERIENCE

LGU Botolan, Botolan Municipal Hall, Zambales — *IT & Administrative Assistant*

February – March 2023

- Supported administrative and IT functions, including troubleshooting software and hardware issues.
- Assisted with maintaining local networks and setting up workstations.
- Demonstrated organizational skills by managing records and performing clerical duties.
